Mark,

We received the Engineering Plans and Storm Water & Erosion Control Calculations for the subject project, dated June 10, 2022 and August 1, 2021 respectively, submitted by Excel Engineering, Inc.

We take no exceptions to the proposed design.

Our review did not include field verification of existing conditions, elevations, grades and/or topography as shown on the plans. The developer and their consultants have the ultimate responsibility for the correct representation of existing field conditions, as well as providing a design that complies with City Ordinances and Standards, and obtain all necessary approvals.
