Common Council Report

Agenda Item: Discussion and Possible Action Regarding Engineering Services – Northeast Lift Station Concept Plan

Meeting Date: September 21, 2021
Presenter: Mark Langer, City Engineer
Department: Department of Public Works - Utilities

Conformance with Strategic Plan:
- Affordability & Financial Stability
- Safe, Inclusive, Welcoming Community
- Diverse Opportunities for Fun and Life-Long Learning
- High Performing Organization with Professional Staff
- Environment for Business Success with Thoughtful Growth and Development

Summary
Baxter & Woodman has prepared a work order to complete conceptual design for the construction of a new lift station to serve undeveloped properties on Milton’s northeast side.

Analysis and Key Issues
The project consists of providing conceptual design for the construction of a new wastewater lift station to determine a service area, lift station site, and construction cost estimates. The station could possibly serve areas that are currently in the City limits such as future phases of Journey Hills subdivision as well areas not currently in the City limits such as possible redevelopment of Bonnie Mead golf course.

Fiscal Impact
The project costs could be assessed to the parcels served by the future lift station.

Recommended Motion
Approve the work order for Engineering Services in the amount of $7,200 for the Northeast Lift Station Concept Plan.
