Dear Alliant Energy customer:

Trees and power lines are not a good combination - especially when Midwestern storms bring lightning, ice or high winds. That's why Alliant Energy works hard to keep trees around power lines properly trimmed.

Line clearance crews will be in your area within the next 12 weeks to trim limbs that are too close to power lines. Our crews are professionals trained to recognize the electrical hazards associated with trimming around power lines. We use the most current practices set forth by the American National Standards Institute and the International Society of Arboriculture. We also comply with Occupational Safety and Health Administration (OSHA) regulations regarding worker safety.

Alliant Energy does not remove or perform heavy trimming on trees for the service wire (line from the pole to your home). We will disconnect service free of charge to allow for safe pruning. A 72 hour advance notice is required for disconnect.

If you have questions, do not hesitate to contact our Customer Service Center at 1-800 ALLIANT (1-800-255-4268). You may also visit our Web site at www.alliantenergy.com or e-mail customercare@alliantenergy.com with your concerns.

Sincerely,

Dan Green
Line Clearance Manager
