1. STORM WATER QUALITY REGULATIONS

1.1 Introduction

Storm water quantity has long been the primary issue considered when designing storm water infrastructure. In the past few decades, the United States Environmental Protection Agency (USEPA) and the Wisconsin Department of Natural Resources (WDNR) have begun to implement regulations addressing storm water quality as well as quantity. The change in focus from quantity to quality is due to rising concern about the condition of the federal and state's natural bodies of water. As a result, both agencies have implemented new regulations affecting the design, construction and maintenance of storm water control systems.

1.2 Federal Regulations

The 1972 amendments to the Federal Water Pollution Control Act (aka the Clean Water Act) established the National Pollutant Discharge Elimination System (NPDES) program. The NPDES program is essentially the mechanism through which the Clean Water Act is enforced. Initially, this program focused on removing pollutants from point discharge sources (e.g. industrial process wastewater and municipal sewage treatment plant discharges).

Over time, it became evident that pollutants from non-point (or diffuse) sources, such as storm water runoff, also played a significant role in water pollution. In 1987, Congress amended the Clean Water Act, directing the USEPA to develop a phased approach to controlling pollutants in storm water runoff.

In 1990, USEPA published rules that established the NPDES Storm Water program. The first phase (Phase I) of the NPDES Storm Water program addressed storm water runoff from industrial sites; construction activities disturbing greater than 5 acres; and municipal separate storm sewer systems (MS4) serving populations greater than 100,000. In 1999, USEPA published Phase II of the NPDES Storm Water program, regulating small MS4 communities in urbanized areas and MS4 communities greater than 10,000 people outside of urbanized areas. Phase II also lowered the threshold for construction sites needing a NPDES permit to one-acre. The Phase II rules went into effect on March 10, 2003.

1.3 State Regulations

The USEPA can delegate administrative activities to states and territories. In some cases, the delegated regulations become minimum standards. In many other cases, states and territories have adopted more restrictive standards. In Wisconsin, the provisions of the Federal Clean Water Act are administered by the WDNR. As a response to 1997 Wisconsin Act 27 and 1999 Wisconsin Act 9 and Clean Water Act requirements, the WDNR developed rules to control polluted runoff from urban and rural areas (generally known as the non-point source program). The non-point source program rules went into effect on October 1, 2002.

Wisconsin Administrative Code NR 216, which addresses storm water discharge permits, was revised in 2002 and 2004 to include the NPDES Phase II storm water requirements. A copy of Chapter NR 216 can be found at the following link*:

<http://www.legis.state.wi.us/rsb/code/nr/nr216.PDF>

* Website links have been provided for convenience throughout the document and are current at the time of printing. Websites change from time to time and, as a result, the referenced links may not work in the future.

Wisconsin Administrative Code NR 216 references Runoff Management Requirements included in Wisconsin Administrative Code NR 151. A copy of Chapter NR 151 can be found at the following link: <http://www.legis.state.wi.us/rsb/code/nr/nr151.PDF>

1.4 Why the City of Milton

The City of Milton is located within the Janesville urbanized area and is, therefore, required to meet NR 216 and the NPDES Phase II storm water requirements. A map of the Janesville urbanized area (including the City of Milton) is located at the following link: http://www.epa.gov/npdes/pubs/ua_wi_janesville.pdf A list of Wisconsin municipalities affected by NR 216 and the NPDES Phase II storm water requirements can be found at the following link: http://www.dnr.state.wi.us/runoff/storm_water/affected.htm Municipalities affected by the revised NR 216 rule must apply for coverage under WDNR's Municipal General Permit by submitting a Notice of Intent to Apply for Coverage Under MS4 General Permit (NOI). The City of Milton's NOI Permit No. WI-S050075 dated 5-31-06 can be found at the following link: http://dnr.wi.gov/runoff/storm_water/permits/ms4/noi/MiltonCity.pdf

1.5 Requirements of NR 216

The NR 216 permit requires that the City comply with specific minimum control measures. These requirements are consistent with the Federal NPDES Phase II storm water program and are discussed below.

Public Education and Outreach - The permittee shall implement a public education and outreach program to increase the awareness of storm water pollution impacts on waters of the state. The program must address such things as: promoting infiltration; promoting

detection and elimination of illicit discharges; and changing behavior that can lead to storm water pollution sources (such as the proper use, handling and disposal of fertilizers, pesticides, pet waste and automobile waste).

This requirement is typically met by distributing educational materials to the public or by conducting equivalent public outreach to increase awareness of storm water impacts on waters of the state. The City is currently a member of the Rock River Storm Water Group, a group of municipalities within the Rock River Basin that are working together to produce a common education and outreach program.

Public Involvement and Participation - The permittee shall implement a program to notify the public of activities required by the permit and to encourage input and participation from the public.

Illicit Discharge Detection and Elimination - The permittee shall develop, implement and enforce a program to detect and remove illicit connections and discharges to the MS4. The program components must include: an ordinance or other regulatory mechanism controlling illicit discharges; field screening and analysis (both initial and ongoing); response and tracing procedures for reported/identified illicit discharges; and enforcement action to remove illicit connections and discharges.

Construction Site Pollutant Control - The permittee shall develop, implement and enforce a program to implement and maintain erosion and sediment control best management practices (BMPs) to reduce pollutants in storm water runoff from construction sites with one-acre or more of land disturbance. The pollutant reduction achieved by the BMPs on the site is required to be 80 percent of the sediment load (total suspended solids) carried in runoff of

the site with no BMPs in place. Examples of BMPs include: tracking pads, silt fence, erosion bales, detention basins with settling basins, grease, oil and sediment separators in storm sewer systems.

Post-Construction Storm Water Management - The permittee shall develop, implement and enforce a program to implement, maintain and enforce controls on discharges from new development and redevelopment projects that disturb one-acre or more of land. For new developments, the pollutant reduction achieved by the BMPs on the site is required to be 80 percent of the sediment load (total suspended solids) carried in runoff of the site with no BMPs in place. For redevelopments or infill development, the pollutant reduction is required to be 40 percent of the sediment load. Activities can include detention basin discharge structure maintenance at detention basins and dredging of detention basins to maintain the ability to settle and collect suspended solids.

Pollution Prevention - The permittee shall develop and implement a program to provide a storm water management program for municipalities providing a 20 percent reduction in total suspended solids by March 10, 2008 and a 40 percent reduction by March 10, 2013. This requires completing an updated storm water management plan including the use of a computer model such as SLAMM or P8. Activities that can be used to provide the 20/40 percent reductions include:

Street sweeping/vacuuming;

Catch basin cleaning;

Water quality detention basins and infiltration basins maintenance;

Leaf and yard waste collection activities;

Rain gardens and other infiltration basins; and

Storm sewer system maintenance;

Storm Sewer System Map - The permittee shall develop and maintain a detailed map of the municipal storm water system.

Annual Report - The permittee shall submit an annual report including:

- the status of permit requirements and compliance with schedules;
- a summary of activities;
- fiscal analysis;
- a summary of inspections and enforcement actions; and
- the identification of water quality improvements or degradations.

Schedule of Compliance – The permittee shall develop a compliance schedule to fully develop, implement and enforce the requirements within 5 years of the initial permit coverage.

2. FUNDING ALTERNATIVES FOR STORM WATER PROJECTS

2.1 Introduction

The City of Milton owns, operates and maintains a storm sewer system with approximately 29 miles of streets with curb and gutter and approximately 11 miles of storm sewer and other miscellaneous drainage improvements such as inlets, manholes, detention basins and grassed swales and ditches. There has always been a cost to the City of Milton to implement storm water management activities and system operation and maintenance. With increased costs required to comply with additional mandated regulations, the City of Milton is exploring options for generating the revenue required to meet the increasing cost.

2.2 General Property Tax

Storm water management and operation has typically been funded through the general tax levy. The general tax levy is based on assessed property value and, therefore, the cost of storm water service is distributed amongst the tax base. The tax base does not include tax-exempt properties such as schools, churches and public property, which also contribute storm water runoff to the system. In addition, the amount of storm water runoff produced from residential property is typically less than the runoff produced from other land use classifications. This is due to the fact that residential property typically has a higher percentage of grassed area, which allows more storm water to soak into the ground, producing less runoff. Therefore, the collection of storm water management funds through general property tax levy may not be the most equitable method of collection because it does not include all properties that contribute storm water runoff (or that benefit from the City's

storm water management program) and is not directly related to the amount of runoff generated from a property.

2.3 Assessments

New infrastructure required to serve new development can and has been required to be funded by the developer of the land through impact fees or development agreements. Special Assessments can be applied to some reconstruction type projects. The assessment area can be based on the entire drainage basin being served. However, assessments can be cost and time consuming as well as controversial as there must be a distinct benefit shown to each property being assessed. It could be argued, for example, that dredging a detention basin benefits the entire community because it provides a portion of the required suspended solids reduction for the entire storm sewer system. This general benefit to the entire community will not support a special assessment.

2.4 Grants and Loans

Financial assistance is available for local pollution control efforts through various WDNR Loan and Grant Programs. A link to the WDNR website can be found at: <http://dnr.wi.gov/runoff/financial.htm#urban> Unfortunately, funding of these grants and loans is capped and is limited.

An example of one of these programs is the Urban Nonpoint Source & Storm Water Management Grant Programs (UNPS & SW). UNPS & SW grant funds are used to control polluted runoff in urban project areas. These funds are awarded to both planning and construction projects. Planning Grants are cost shared up to a maximum of 70 percent and the construction costs are cost shared up to 50 percent up to a maximum of \$150,000. It

should be noted that UNPS & SW grant funds may not be used to fund dredging projects, projects related to new developments or projects that are not water quality based. Projects that are not water quality based would include projects only designed to relieve flooding or drainage issues. Therefore, funding can be limited based on the specific use and the amount of funding available.

Grants and loans can be an effective tool to continue to reduce and offset the cost of storm water system management activities regardless of the funding mechanism used to collect the remainder of the funds to operate the system, but are not a reliable, sufficient form of funding.

2.5 Storm Water Utilities

Storm water utilities collect the funding necessary for storm water management activities based on the amount of storm water runoff produced on a particular property. The amount of storm water runoff produced is typically calculated relative to the amount of impervious area on the property. Storm water utilities include property owners that are tax-exempt and, therefore, do not contribute to funding storm water management under a tax base method of collection. Therefore, the storm water utility is collecting from all properties that contribute storm water runoff and/or benefit from the City's storm water management activities.

3. STORM WATER UTILITY BUDGET

3.1 Introduction

A preliminary storm water utility budget was developed with input from City staff. The proposed budget includes costs to fund new storm water management activities (as mandated by federal and state storm water regulation requirements of NR 216) as well as capital improvements and existing storm water system maintenance activities.

3.2 Existing Storm Water System, Activities and Budget

The City of Milton operates and maintains a storm sewer system with approximately 29 miles of streets with curb and gutter, approximately 11 miles of storm sewer and other miscellaneous drainage improvements such as inlets, manholes, detention basins and grassed swales and ditches. In the past, the cost for the majority of the storm water system management activities have been distributed amongst various City department budgets.

3.3 Storm Water Utility Services

In addition to operating and maintaining the storm sewer system described above, the operation and maintenance activities required to meet the mandated requirements of federal and state regulations discussed in the introduction in Section 1 will also be provided by the utility.

The proposed storm water utility budget includes planning, staff, storm sewer system and BMPs maintenance, detention basin management, capital improvement projects, equipment replacement fund, management and other expenditures related specifically to storm water management.

Storm sewer maintenance and best management maintenance activities include, but are not limited to, street sweeping, catch basin cleaning, leaf and brush collection, annual televising of the existing storm sewer system to detect system failure. Other activities that would be eligible to be funded by the utility (but not included at this time) include curb and gutter repairs and re-ditching and/or ditch cleaning.

The Detention Basin Management Fund activities include dredging and sediment removal of existing and future detention basins to maintain intended operation levels. Structure maintenance and mowing at the detention basins owned and maintained by the City are included.

The Capital Improvement Program Fund (CIP) includes storm sewer system repair including pipes, manholes, inlets, curb and gutter as part of street reconstruction projects. The CIP could include new pretreatment basins (such as the proposed Mud Lake Road oil separator) or new BMPs (such as bioretention and rain gardens), or new regional or local storm water management basins.

The CIP will be redefined and updated following the completion of future planning documents required by NR 216. It is recommended that the CIP be updated on a regular basis to maintain an appropriate storm water utility budget and user fee rate to reflect anticipated capital improvement projects.

The Equipment Replacement Fund includes a budget to replace the street sweepers and mowers required to maintain the drainage systems.

3.4 Storm Water Utility Needs and Proposed Budget

The preliminary annual storm water utility budget was determined to be approximately \$350,000/year. During the utility formation process, the City Council elected to make the following changes to moderate the initial utility budget:

- The Year 1 Detention Basin Management Fund and the Equipment Replacement Fund would only be financed at 20 percent and 50 percent, respectively, of originally estimated levels.
- The Capital Improvement Fund and Emergency Response Fund was completely removed in Year 1.
- The full storm water management plan, general planning, mapping and soil testing were reduced from \$35,000 to \$6,000.

These changes were made to allow collection of revenue in Year 1 to cover existing expenses, to begin funding a few accounts and to allow more accurate funding levels to be determined for subsequent years based on future planning and studies. Therefore, the first year annual budget was determined to be \$222,897. Appendix A includes more details summarizing the original preliminary total annual budget for the storm water utility for the Years 1 through 3 and the approved budget for Year 1.

This budget total has been used to determine the user fee rate in subsection 5.6 and the individual account charges and the evaluation of property impacts in Section 5.

It should be noted that the budget established is only for Year 1 of the utility. If the City Council decides to fund portions of the budget through the general tax levy, then the utility budget (and, therefore, the fees) will be reduced. In turn, if the City Council decides to adjust the funding to match the preliminary proposed funding levels, then the utility budget and fee rates will be increased. It is recommended that the capital improvement plan be updated on a regular basis to allow the storm water utility budget to reflect current storm water utility needs and to maintain an appropriate level of service.

4. IMPERVIOUS AREA ANALYSIS

4.1 Introduction

The impervious area of a parcel is the amount of area on that particular parcel that does not allow water to absorb easily into the soil. There is a strong correlation between the amount of impervious ground cover (pavement, roofs, patios, etc.) on a property and both the amount of storm water runoff leaving that property and the level of pollution contained in the runoff. The greater the impervious area, the less vegetated and soil areas there are to absorb rainfall and snow melt. In addition, impervious areas accumulate pollutants which are readily carried offsite by storm water runoff. The more impervious area, the more pollutants the City must manage in the storm water system.

Therefore, the impervious area analysis is an appropriate basis for developing utility user fees. These impervious areas include hard surfaces such as rooftops, driveways, sidewalks and patios, as well as compacted areas of soil such as gravel driveways. The measurement and calculation of impervious area on a parcel determines the proportionate share of the annual storm water utility budget that will be charged to each individual property parcel and/or utility customer.

4.2 Data Sources and Impervious Area Measurement Method

The Rock County Geographic Information System (GIS) database was obtained from the Rock County GIS department. The GIS database includes 2006 aerial photography. Using computer aided drafting (CAD), the impervious area was isolated and measured for each parcel within the City.

The City of Milton staff provided information regarding building permits dated after the aerial photography. Information on the proposed building and driveway footprints from

the building permits were used to refine the impervious area on lots that were improved since the date of the aerial photograph.

4.3 Residential Parcels

The individual impervious area for each single-family residential lot was not calculated. Instead, an average impervious area for all single-family lots was calculated. The City of Milton currently has 1,557 single-family residences within the study area. A representative sample of 40 random single-family residential properties were measured for impervious area. The average impervious area of a residential property is 4,081 square feet with a 95 percent confidence interval within +/- 410 square feet. To further reduce the margin of error, the random parcels chosen were stratified by the lot size distribution of all the single-family residential parcels within the City. Table 1 below analyzes the stratification of the sample of improved residential lots versus the residential sample.

City of Milton, Wisconsin Storm Water Utility Feasibility Study

TABLE 1

Stratification of Sample Residential Properties

Lot Size Distribution	Number of Lots in Distribution	% of Total Lots	Number of Lots in Distribution in Sample	% of Total Sample	Total Lot Size of Parcels in Distribution (SQ FT)	Average Lot Size of Parcels in Distribution (SQ FT)	Total Lot Size of Parcels in Distribution Sample (SQ FT)	Average Lot Size of Parcels in Distribution in Sample
0-10,000 SQ FT	370	24%	10	25%	3,064,836	8,283	83,166	8,317
10,001-15,000 SQ FT	741	48%	18	45%	8,972,887	12,109	221,081	12,282

50,001-70,000 SQ FT	15	1%		0%	863,379	57,559	0	0
70,001-130,000 SQ FT	18	1%		0%	1,631,042	90,613	0	0
>130,001 SQ FT	15	1%		0%	4,324,515	288,301	0	0
Total	1557	100%	40	100%				

4.4 Duplex Parcels

For the feasibility study, all duplex parcels were considered equivalent to a single-family residential property. The City of Milton currently has 151 duplex residence parcels.

4.5 Multi-family and Non-residential Parcels

All multi-family parcels of three or more units and all non-residential parcels (including tax-exempt properties) were individually measured to determine the impervious area.

5. USER FEE RATE STRUCTURE DETERMINATION

5.1 Introduction

The user fee rate structure determines the distribution of the proportionate share of the annual storm water utility budget charged to each individual property or utility customer. The basis of this structure is the equivalent run-off unit (ERU).

5.2 Equivalent Run-off Unit (ERU)

The ERU is equivalent to the average single-family residential impervious area as determined in subsection 4.3 Residential Parcels.

1 ERU = 4,081 square feet of Impervious Area.

5.3 Residential Parcels

All of the 1,557 single-family residences within the study area are determined to be equal to one (1) ERU. Single-family residential lots that are not currently improved are not included.

5.4 Duplex Parcels

All two-unit multi-family parcels are considered to be duplex parcels. One duplex parcel is also determined to be equal to one ERU. If the billing account is setup with two separate accounts, the single ERU is divided to each unit of the duplex at 0.5 ERUs for each account. If there is a single billing account for the duplex parcel then the full ERU is applied to the account.

5.5 Multi-family and Non-residential Parcels

All multi-family parcels of three units or more and all non-residential parcels were measured to determine the impervious area on each parcel. The impervious area on each

individual parcel is divided by the base ERU value of 4,081 square feet of impervious area. The resulting quotient is the number of ERUs to be invoiced for an individual parcel. For example, a commercial parcel with an impervious area of 9,800 square feet will be charged a fee based on 2.4 ERUs ($9,176 \text{ sq ft} \div 4,081 \text{ sq ft/ERU} = 2.4 \text{ ERUs}$).

5.6 Total ERUs and User Fee Rate

The City of Milton currently has a total of 4,043 ERUs. Table 2 below summarizes the total 4,043 ERUs in each unit of parcel classification.

Using the total number of ERUs and the first year storm water utility annual budget of \$222,897/year, the unit cost per ERU per month is calculated to be \$4.59/month/ERU ($\$222,897/\text{year} \div 4,043 \text{ ERU} \div 12 \text{ month/year} = \$4.59/\text{month/ERU}$).

City of Milton, Wisconsin Storm Water Utility Feasibility Study

TABLE 2

Total ERUs by Unit of Classification

Unit of Classification	Units of Developed Parcels (EA)	Total Area of Impervious in Class (sq ft)	Average Impervious Area in Class (sq ft)	Estimated ERUs	ERU Percent of Total
Single-Family Residential	1,557		4,081	1,557	38.5%
Duplex Residential	151			151	3.7%
Multifamily Residential	33	702,571	21,290	172	4.3%
Commercial/Industrial	191	6,597,639	34,543	1,617	40.0%
Tax Exempt	<u>51</u>	2,227,773	43,682	<u>546</u>	<u>13.5%</u>
Total	1,983			4,043	100.0%

6. EVALUATION OF PROPERTY IMPACTS

6.1 Introduction

This section summarizes the proposed annual storm water utility fee for each property classification using the established user fee rate. In addition, a comparison of cost distribution between the tax basis and the storm water utility fee basis is provided. The impacts are shown based on a first year annual utility budget of \$222,897.

6.2 Residential Parcels

Each of the City of Milton's 1,557 single-family residences are equal to one (1) ERU. Therefore, all single-family residential units will be charged \$4.59/month.

6.3 Duplex Parcels

Each duplex parcel within the City is equal to one (1) ERU. If the billing for a duplex is set up with two separate accounts, then each account will be assigned 0.5 ERU and will be charged a fee of \$2.30/month. If the entire duplex has a single utility account, then the account will be charged \$4.59/month.

6.4 Multi-family and Non-residential Parcels

All multi-family parcels of three units or more and all non-residential parcels were evaluated to determine the number of ERUs on each parcel (based on the amount of impervious area measured on the parcel). Each of these accounts will be charged \$4.59/month per ERU. For example, a commercial parcel with an impervious area of 9,800 square feet will be charged a fee based on 2.4 ERUs at an annual rate of \$4.59/month/ERU for a total of \$11.02/month ($9,800 \text{ sq ft} \div 4081 \text{ sq ft/ERU} \times \$4.59/\text{month/ERU} = \$11.02/\text{month}$).

6.5 Tax Exempt Properties

All tax exempt properties are considered the same as non-residential properties and the utility fees are calculated in the same manner.

6.6 User Fee Rate Versus Tax Based Funding Redistribution

Table 3 shows the comparison of the redistribution of cost between tax-based funding and fee-based funding of the storm water management system for the various property classifications.

6.7 Utility Customer Database of Annual Fees

Appendix B provides an alphabetical listing by account owner's name of the utility-wide customer database and indicates the projected annual fee per customer based on the first year annual budget of \$222,897/year and the cost of \$4.59/month/ERU (\$55.08/year/ERU). Appendix C provides a numerical listing by parcel number of the utility-wide customer database and indicates the projected annual fee per customer based on the first year annual budget of \$222,897/year and the cost of \$4.59/month/ERU (\$55.08/year/ERU).

**City of Milton, Wisconsin
Storm Water Utility Feasibility Study**

TABLE 3

User Fee Rate Versus Tax Based Funding Redistribution

Unit of Class	Units of Developed Parcels (EA)	Area of Impervious Parcel (sq ft)	Average Impervious Area (sq ft)	Estimated ERUs	ERU Percent of Total	Storm Water System Funding					
						Cost			Percentage		
						Tax Based	Fee Based	Redistribution	Tax Based	Fee Based	Redistribution
Single-Family Residential	1557		4,081	1557	38.5%	\$ 85,846					
Duplex Residential	151			151	3.7%	\$ 8,325					
Multi-family Residential	33	702,571	21,290	172	4.3%	\$ 9,492					
Residential Subtotal				1880	46.5%	\$173,860	\$103,663	\$(70,197)	78.0%	46.5%	-31.5%
Commercial/Industrial	191	6,597,639	34,543	1617	40.0%	\$ 49,037	\$ 89,136	\$40,099	22.0%	40.0%	18.0%
Tax Exempt	51	2,227,773	43,682	546	13.5%	\$ 0	\$ 30,098	\$30,098	0.0%	13.5%	13.5%
Total	1983			4043	100.0%	\$222,897	\$222,897		100.0%	100.0%	

7. STORM WATER UTILITY ORDINANCE

7.1 Introduction

The storm water utility ordinance is included as Appendix D. The ordinance provides language on the creation of the storm water utility and policies.

7.2 Credits

The ordinance includes a credit policy for non-residential property owners. Non-residential property owners who reduce their impact on the City's storm water management program will be able to apply for a credit.

In order to be eligible for a credit, the reduction in impact must exceed the minimum storm water management requirements in force at the time the management device was constructed. For example, if newly developed commercial property were to construct a storm water detention pond meeting the current minimum detention standards, it would not be eligible for a credit. If, however, the pond were oversized to provide a benefit beyond the current minimum requirements, the property would be eligible for a credit.

There are certain storm water management activities that the City must conduct that benefit the entire community, regardless on whether or not an individual property contributes runoff to the City's storm water system. Therefore, a maximum credit of 50 percent has been established.

CITY OF MILTON, WISCONSIN - STORMWATER UTILITY FEASIBILITY STUDY

APPENDIX A

STORMWATER UTILITY BUDGET

September-09

	2009 Total	% S.W.	Approved Budget	Original Estimated Budgets			Prorated 1/4 of 2009*

**CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE**

COMMON COUNCIL of the CITY of MILTON

ORDINANCE #296

CITY OF MILTON MUNICIPAL CODE

CHAPTER 74 UTILITIES

ARTICLE IV. STORM WATER UTILITY

DIVISION 1. GENERALLY

Secs. 74-272 – 74-300 Reserved.

DIVISION 2. STORM WATER UTILITY

Sec. 74-301 Purpose and Necessity

Whereas, the City Council of the City of Milton, Rock County, Wisconsin, does hereby find that the management of storm water and other surface water discharges to bodies of water within the City of Milton is a matter that affects the public health, safety and welfare of the City of Milton, its citizens and businesses and others in the surrounding area.

Whereas, failure to effectively manage storm water affects the operations of the City of Milton Sanitary Sewer Utility by, among other things, increasing the likelihood of infiltration and inflow into the sanitary sewer system. Whereas, surface water runoff may cause erosion of lands, threaten residences and businesses with water damage, and create environmental damage to the rivers, streams and other bodies of water within and adjacent to the municipality.

Whereas, a system for the collection and disposal of storm water provides services to all properties within the City of Milton and surrounding areas, including those properties not currently served by the systems.

Whereas, the cost of operating and maintaining the City of Milton's storm water management system and financing necessary repairs, replacements, improvements, and extensions thereof should, to the extent practicable, be allocated in relationship to the services received from the system.

Whereas, the City Council of the City of Milton, Rock County, Wisconsin finds that the provisions herein are required by and consistent with the Federal Clean Water Act (33 U.S.C.S. 1251 et seq.) and Wisconsin Statutes, both as amended from time to time, the regulations set out thereunder and the WPDES permit issued to the municipality by the State of Wisconsin Department of Natural Resources.

Whereas, in order to protect the health, safety and welfare of the public, the City Council of the City of Milton, Rock County, Wisconsin hereby exercises its authority to establish

**CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE**

a Storm Water Management Utility and establish the rates for storm water management services.

Whereas, by adopting and publishing as required by law the regulations contained in this chapter, the City Council of the City of Milton, Rock County, Wisconsin is acting pursuant to authority granted by Chapters 62 and 66, Wisconsin Statutes.

Sec. 74-302 Authority

The City Council of the City of Milton, Rock County, Wisconsin, acting through the Storm Water Management Utility, may acquire, construct, lease, own, operate, maintain, improve, modify, extend, expand, replace, clean, dredge, repair, conduct and manage programs, finance, borrow monies, assess and/or levy fees for such facilities, operations, and activities, as are deemed by the City Council of the City of Milton, Rock County, Wisconsin to be proper and reasonably necessary for a system of storm and surface water management and to obtain compliance with applicable local, state and federal storm water management requirements with which the City of Milton must comply. Facilities may include, without limitation due to enumeration, surface and underground drainage facilities, inlets, manholes, catch basins, sewers, channels, watercourses, retaining walls, ponds, detention and retention basins, infiltration facilities, streets, roads, ditches and such other facilities as will support a storm water management system.

Sec. 74-303 Establishment of Storm Water Management Utility

In order to protect the health, safety, and welfare of the public, the City Council of the City of Milton, Rock County, Wisconsin is exercising its authority to establish the City of Milton Storm Water Management Utility and set the rates for storm water management services.

The Public Works Director or Administrator shall be in charge of the day-to-day operation of the Storm Water Management Utility, subject to the supervision of the City Council of the City of Milton, Rock County, Wisconsin.

The City Council of the City of Milton, Rock County, Wisconsin is acting under the authority of Chapters 60 and 66 of the Wisconsin Statutes.

Sec. 74-304 Powers and Duties of Utility

(1) Facilities. The City of Milton through the Storm Water Management Utility may acquire, construct, lease, own, operate, maintain, extend, expand, replace, clean, dredge, repair, conduct, manage, and finance such facilities as are deemed by the City of Milton, Wisconsin to be proper and reasonably necessary for a system of storm and surface water management. These facilities may include, without limitation by enumeration, surface and underground drainage facilities, sewers, watercourses,

CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE

retaining walls, and ponds and such other facilities as will support a storm water management system.

- (2) **Rates and Charges.** The City of Milton through the Storm Water Management Utility may establish such rates and charges as are necessary to finance planning, design, construction, maintenance, and operation of the facilities and to conduct necessary storm water programs and activities in accordance with the procedures set forth in this ordinance.
- (3) **Budgeting Process.** The City of Milton through the Storm Water Management Utility shall prepare an annual budget, which is to include all operation and maintenance costs, debt service, and other costs related to the operation of the Storm Water Management Utility. The costs shall be spread over the rate classifications as determined by the City Council of the City of Milton, Rock County, Wisconsin.
- (4) **Excess Revenues.** The City of Milton will retain any excess of revenues over expenditures in a year in a segregated Storm Water Enterprise Fund which shall be used exclusively for purposes consistent with this ordinance.

Sec. 74-305 Definitions

Words not defined herein shall be construed to have the meaning given by common and ordinary use as defined in the latest edition of Webster's Dictionary. The word "shall" is mandatory and the word "may" is permissive.

Administrator. The City of Milton, City Administrator or designee.

City Council. The City Council of the City of Milton, Rock County, Wisconsin or designee.

Condominium. Property subject to a condominium declaration established under Ch. 703, Wisconsin Statutes.

Duplex. A residential space containing two dwelling units.

Dwelling Unit. One or more rooms that are arranged, designed, or used as living quarters for occupancy by a single-family unit or as classified by the City of Milton's Zoning Codes. Individual bathrooms and complete kitchen facilities, permanently installed, shall always be included for each dwelling unit.

Equivalent Runoff Unit or ERU. The basic unit by which the Storm Water Management Utility charge is calculated; it is based upon the average amount of impervious area on a single-family residential parcel as determined from a representative sample of fully

CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE

developed single-family parcels within the municipality. An ERU is established as 4081 square feet.

Farmstead Home Site. That portion of any agricultural property which contains one or more dwelling units, regardless of whether the dwelling units are on a separate lot or parcel.

Impervious Area or Impervious Surface. A horizontal surface that has been compacted or covered with a layer of material so that it is highly resistant to infiltration by rainwater or the runoff from snow melt. It includes, but is not limited to, semi-impervious surfaces such as compacted clay or gravel, as well as streets, roofs, roof extensions, patios, decks, porches, sidewalks, loading docks, parking lots, driveways and other similar surfaces.

Lot. A parcel of land having a width and depth sufficient for one principal building and its accessory building together with open spaces required by the City of Milton's Zoning Ordinance and abutting a public street or access easement.

Multi-family Residential. A residential space consisting of three or more dwelling units.

City of Milton. The City of Milton, Rock County, Wisconsin.

Non-Residential Property. Any developed lot or parcel not exclusively residential property as defined herein, including, but not limited to, transient rentals (such as hotels and motels), mobile home parks, commercial, industrial, institutional, governmental property, and parking lots.

Person. Each and every property owner, including, but not limited to, natural persons, partnerships, corporations, limited liability companies, limited liability partnerships, joint ventures, and all other legal entities of any kind or nature.

Public Works Director. The duly appointed Public Works Director or designee.

Residential Property. Any lot, parcel, or farmstead home site developed exclusively for residential purposes including, but not limited to, single family homes, manufactured homes, duplex units, multifamily apartment and condominium units, but not including transient rentals (such as hotels and motels).

Single Family Home. Any residential property consisting of a single dwelling unit.

Storm Water Management Program. Activities required to control storm water runoff to protect the health, safety, and welfare of the public, and to comply with state and federal regulations. It includes construction and maintenance of physical infrastructure as well development, implementation and management of policies, procedures and programs necessary for regulatory compliance. It includes but is not limited to street sweeping, erosion control, storm water basin improvements and maintenance, culvert and storm

CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE

sewer maintenance, storm water testing, storm water management planning and related public education.

Storm Water System. The system of streets, curbs, gutters, berms, swales, detention and retention ponds or basins, infiltration basins, pipes, outfalls, inlets, and other components of infrastructure owned and/or maintained by the municipality for the purpose of managing, gathering, transmitting, treating or conveying storm water. This term includes tributaries, creeks, rivers, and streams.

Storm Water Management Utility. The utility established under this ordinance for the purpose of managing storm water and imposing charges for the recovery of costs connected with such storm water management.

Storm Water Management Utility Charge. The fee imposed under this ordinance for the rendering of services by the Storm Water Management Utility.

Undeveloped Property. Property that has not been altered from its natural state by the addition of any improvements such as a building, structure, impervious surface, change of grade or landscaping; agricultural use of property; or property that has been graded for residential or commercial development but does not contain buildings, structures, or other improvements. For new construction, a property shall be considered developed upon issuance of a building permit.

Sec. 74-306 Utility Rates and Charges

- (1) By this Ordinance, the City of Milton is establishing the basis for the rates that will be used to calculate and impose a charge upon each developed lot or parcel within the City of Milton for services and facilities provided by the City Council consistent with this ordinance.
- (2) The actual rate of charges to be imposed and any future changes in those rates for each customer classification shall be made by resolution. All rates established pursuant to this ordinance shall be fair and reasonable. A schedule of current charges shall be maintained and on file in the office of the Municipal Clerk.
- (3) Charges shall be imposed to recover all or a portion of the costs incurred by the City of Milton for storm water management. Such charges may include the following components:
 - (a) Equivalent Runoff Unit (ERU) Charge. The ERU charge shall be assessed for each developed property in the City of Milton based upon the amount of impervious area as reasonably determined by the Administrator. The Administrator shall be responsible for determining the impervious area based on the best available information, including, but not limited to, data supplied by the

**CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE**

Municipal Assessor, aerial photography, satellite imagery, the property owner, tenant, or developer. The formula for the ERU charge shall reflect that of a typical single-family unit.

1. The charge imposed for a single-family structure shall be the rate for one ERU.
 2. The charge imposed for duplex residential properties shall be the rate of one-half (0.5) ERU for each individual dwelling unit existing on the property.
 3. The charge imposed for each unit in a multifamily residential property will be the rate of the ERUs for that property (based on the total impervious area) divided by the number of units.
 4. Other units of property (Non-Residential, Commercial, Industrial and Tax Exempt) will be charged multiples of the ERU based on the impervious area. The factor shall be rounded to the nearest 0.1. The minimum charges for any nonresidential parcel shall be equal to the rate for one ERU.
 5. All unoccupied developed lots and parcels shall be subject to the Storm Water Management Utility charges.
 6. Owners of multi-unit, non-residential properties wishing to have the utility fee billed to the individual units within the property shall provide the City Milton with documentation demonstrating the equitable distribution of the fee to the individual units.
- (b) Special Charge (SC). A Special Charge or Assessment may be imposed on property that is in a specific area benefited by a particular storm water management facility pursuant to Section 66.0627, Wisconsin Statutes. The special charge will be developed to reflect the benefits/services in a particular area that may not be appropriate to spread to property throughout the City of Milton.

Sec. 74-307 Customer Classifications

- (1) For purposes of imposing the Storm Water Management Utility charges, all lots and parcels within the City of Milton are classified into the following customer classes:
 - (a) Residential - Single-Family including Farmstead Home Sites.
 - (b) Residential - Duplex.
 - (c) Residential - Multifamily
 - (d) Nonresidential.
 - (e) Agricultural.
 - (f) Undeveloped.
- (2) The Administrator shall prepare a list of lots and parcels within the City of Milton and assign such appropriate classification to each lot or parcel. The billing amount shall be updated by the Administrator based on any additions to the impervious area as approved through the building permit process.

CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE

- (3) The City Council may make such other classifications in accordance with this ordinance as will be likely to provide reasonable and fair distribution of the costs of the Storm Water Management Utility.

Sec. 74-308 Billing

- (1) The City of Milton's Clerk/Treasurer shall take all steps necessary to invoice all charges and collect all Storm Water Management Utility payments for the Storm Water Management Utility. The Clerk/Treasurer may contract for the billing and collection of storm water fees. The Clerk/Treasurer shall allocate the actual cost incurred of billing and collecting to the expense of system-wide management and administration of the Storm Water Management Utility.
- (2) Storm Water Management Utility charges shall be allocated to the property served and included on the monthly utility bill for each property. Billings for Storm Water Management Utility charges shall be mailed to the designated utility bill recipient, but this mailing shall not relieve the owner of the property from liability for rental property in the event payment is not made as required in this article. The owner of any property served which is occupied by tenants shall have the right to examine collection records of the Municipality for the purpose of determining whether such charges have been paid by such tenants, provided that such examination shall be made at the office at which the records are kept and during the hours that such office is open for business. Billings for Storm Water Management Utility charges shall be mailed to owners of record for tax-exempt property.

Sec. 74-309 Penalties; Lien

Storm Water Management Utility charges shall not be payable in installments. If Storm Water Management Utility charges remain unpaid after a period of 30 days from the date the utility bill was mailed, such bill shall be determined delinquent. The City of Milton may collect delinquent charges under Wis. Stat. §§ 66.0821(4) and 66.0809(3). All delinquent charges shall be subject to a three (3%) percent penalty per quarter in addition to all other charges, including prior penalties or interest that exist when the delinquent charge is extended upon the tax roll as a delinquent tax against the real property.

Sec. 74-310 Credits and Adjustments

Credits and adjustments may be available to individual nonresidential property owners. It shall be the burden of the nonresidential property owner to request such a credit and/or adjustment and to demonstrate to a reasonable degree of certainty with evidence that a fee credit and/or adjustment is warranted. All applications for credits and adjustments shall be reviewed by the Administrator.

CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE

A. Credits

1. Eligibility. A property owner may be eligible for a credit, in the form of a reduced ERU multiplier, for a property where all of the following conditions apply subject to the discretion, authority and approval of the Common Council.
 - a. The City of Milton's cost of providing service or making service available to the property has been lessened.
 - b. The property conforms to all applicable codes and standards of the City of Milton in effect at the time of parcel development.
 - c. The property has been assigned a nonresidential or multi-family residential user classification by the Administrator.
2. Maximum Credit. The maximum aggregate credit for any individual property is 50% of its ERU charge, regardless of how many credits the property may otherwise be qualified to receive.
3. Credit Types. The following credits may be available for a property that meets all eligibility requirements.
 - a. Zero Discharge Credit. Credits shall be considered for properties that discharge storm water directly into a water body not maintained in any way by the City of Milton, or directly into a water body downstream of where it is maintained by the City of Milton, or is otherwise contained entirely upon the property.
 - b. Peak Discharge Credit. Credits shall be considered for owners who maintain private storm water management facilities such as retention or detention basins that exceed state and local discharge rate requirements applicable to the site.
 - c. Water Quality Credit. Credits shall be considered for owners who maintain private storm water management facilities that improve the quality of runoff from the property to a degree that exceeds state and local water quality requirements applicable to the site.

B. Adjustments. An owner may be eligible to have the number of ERUs assigned to the owner's property adjusted under the following conditions:

1. Nonresidential Property. The owner of a nonresidential property who believes the number of ERUs allocated to such property to be incorrect may submit an adjustment request to the Administrator. The allocated ERUs may be adjusted if the owner can provide information showing that the impervious area measurement is incorrect.
2. Undeveloped Property. The owner of any property that can show the property to be in an undeveloped natural state with no built impervious area may request that the property status be changed to exempt.

CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE

Sec. 74-311 Exemptions

Public rights-of-way and railroad rights-of-way are considered part of the City of Milton's storm water conveyance system and is therefore exempt from the Storm Water Utility Management fee. However, municipal and railroad facilities, including buildings, parking lot, storage yards, or other developed land are not exempt from the Storm Water Utility Management fee.

Sec. 74-312 New Construction

- (1) Except for single-family structures, a property owner shall be responsible for submitting a Storm Water Management Utility service application at the time a building permit application is submitted or a site plan review is conducted, whichever occurs sooner. The application shall be made on a form prescribed by the City of Milton and provided with each application for a building permit or application for site plan review. No building permit shall be issued until such application is submitted and approved by the Administrator or his designee.
- (2) The property owner shall be responsible for submitting record drawings and/or site inspections to prove improvements have been constructed per approved plan. Any deficiencies may result in site improvements and/or revocation of Storm Water Management Utility credits.
- (3) The property owner shall be liable for all storm water charges attributable to such property from the date of commencement of construction.

Sec. 74-313 Method of Appeal

Appeals shall be limited to the customer classification determination, a determination of ERU's, or ERU credits made for the calculation of total impervious area for nonresidential properties. There shall be no right of appeal as to the underlying findings and necessity of this ordinance or the single-family unit charge as applied to any single-family, duplex, residential - multifamily, or residential condominium properties.

- (1) The Storm Water Management Utility charge may be appealed as follows:
 - (a) A written appeal shall be filed with the City Clerk prior to the Storm Water Management Utility charge due date; or
 - (b) Within thirty (30) days of payment, a written challenge to the Storm Water Management Utility charge must be filed with the City Clerk on behalf of the customer, specifying all bases for the challenge and the amount of the Storm Water Management Utility charge the customer asserts is inappropriate. Failure to file a challenge within thirty (30) days of payment waives all right to later challenge the charge.

**CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE**

- (c) The disputed charge shall be held in abeyance until the Administrator has made a determination pursuant to this section.
- (2) The Administrator will determine whether the Storm Water Management Utility charge is fair and reasonable, or whether a refund is due the customer. The Administrator may act with or without a hearing and will inform the customer in writing of its decision. The Administrator or his designee may, at its discretion, require access to the property to assist in its determination.
- (3) The customer has thirty (30) days from the decision of the Administrator to file a written appeal to the City Council.
- (4) If the City Council or Administrator determines that a refund is due the customer, the refund will be applied as a credit on the customer's next monthly storm water management billing, if the refund will not exceed the customer's next quarterly storm water management billing, or will be refunded at the discretion of the City Clerk.

Sec. 74-314 Budget Excess Revenues/Reserves

The Storm Water Management Utility revenues shall be accounted for in a separate storm water special revenue fund and upon the completion of a detailed accounting of all assets in a separate storm water enterprises fund maintained by the City of Milton. The utility shall prepare an annual budget, which is to include all administration, management, operation, maintenance, debt service, capital improvement, and other costs related to the operation of the Storm Water Management Utility. The budget is subject to approval by the City Council. The costs shall be spread over the rate classifications as determined by the City Council. Any excess of revenues over expenditures in a year will be retained in a segregated Storm Water Enterprise Fund which shall be used exclusively for purposes consistent with this ordinance for subsequent years' needs.

Sec. 74-315 Severability

If any provision of this ordinance is found to be illegal, the remaining provisions shall remain in effect. In the event any section, subsection, clause, phrase, or portion of this ordinance is for any reason held illegal, invalid, or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct, and independent provision, and such holding shall not affect the validity of the remainder of this ordinance. It is the legislative intent of the City Council that this ordinance would have been adopted if such illegal provision had not been included or any illegal application had not been made.

Sec. 74-316 Repeal

All ordinances or parts of ordinances and resolutions in conflict herewith are hereby repealed.

**CITY OF MILTON, WISCONSIN
STORM WATER UTILITY FEASIBILITY STUDY
APPENDIX D
STORM WATER UTILITY ORDINANCE**

Sec. 74-317 Amendments

This Ordinance may be amended in accordance with the adopted rules of the City Council. Amendments to this Ordinance shall take effect after a public hearing with a Class I notice is held before the City Council and adopted by the City Council.

Sec. 74-318 Effective Date

This Ordinance shall take full effect for all purposes on September 1, 2009.
